

Tomer Cohen

Full-Stack Software Engineer

Phone: 054-321-0990 | Email: tomernado1233@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Software Engineer with a focus on secure Full-Stack development, AI integration and autonomous AI agents, and complex OOP architecture. Experienced in end-to-end application development within a web development business ([Web4You](#)), leveraging AI-assisted workflows to optimize system performance. Proficient in S-SDLC methodologies and OWASP security standards, with a strong emphasis on algorithmic efficiency and scalable backend design. Currently a 3rd-year Computer Science student with a professional background in operations management, bringing a rigorous, team-oriented mindset to deliver high-quality solutions under pressure.

Technical Skills

- **Languages:** C#, Java, JavaScript, Python, SQL, C, C++.
- **Architecture & Security:** OOP (Design Patterns), S-SDLC, MVC, JWT, bcrypt, RESTful API Design, OWASP.
- **Frontend, Backend & UI:** React.js, MUI, .NET, Node.js, Express, Supabase, Docker, Apache Tomcat, Jakarta Servlets, WinForms.
- **Databases & Data Science:** MySQL, SQL Server, MongoDB, Pandas, NumPy, Scikit-Learn.
- **Tools & Environments:** VS Code, Linux, Git, Vite, Postman, AI-Assisted Development (Claude, Gemini and more).

Self Projects

AI Autonomous Agents | RAG, LLMs, Supabase, Function Calling, Zod

- Engineered resilient agent systems ([AI Kitchen Assistant](#), [SocialOrg](#)) utilizing RAG and LLMs (Gemini/Claude). Implemented self-healing pipelines, strict governance rules, and token optimization to ensure stability while minimizing hallucinations.

Full-Stack Web & Secure E-Commerce | React, Node.js, Express, MySQL, Docker

- Developed [DevStore](#), a high-traffic e-commerce platform with secure authentication and real-time dashboards. Architected the
- (S-SDLC), focusing on OWASP compliance, Network Isolation via Docker, and robust security protocols (JWT, bcrypt).
- Managed end-to-end lifecycles for client projects ([ShiftManager](#), [Interviewer](#)), leveraging AI-assisted workflows to deliver production-ready, high-quality code.

Engineering Architecture Portfolio | C#, Java, Unity, React, OOP, Design Patterns

- Architected [Tornado Zone](#), a portfolio of high-performance applications ([3D Open World game](#), [Slot Machine](#)) and complex client-server systems.
- Applied advanced OOP principles, Design Patterns, and Clean Code to achieve strict decoupling between business logic and UI, managing data synchronization and optimized HTTP req-res lifecycles.

Work Experience

[Web4You](#) | Full-Stack Developer & Co-Founder | 2025 – Present

- **End-to-End Development:** Delivered 20+ web apps (React, JS, HTML/CSS). Translated client requirements into scalable features, leveraging AI (Claude) to optimize workflows and code architecture.
- **Backend & Security:** Architected databases and infrastructure via Supabase (SQL). Implemented robust authentication, RBAC, and seamless API integrations (CRMs, payment gateways) for secure systems.

Creative Strategist & Marketing | Freelance | 2023 - 2025

- Managed end-to-end production of digital marketing content, translating client concepts into delivered final products.

Operations & Team Management (Restaurant) | 2021 – 2023

- Led daily operations and staff coordination in a high-pressure environment.
Responsible for real-time crisis resolution, shift management, and maintaining operational efficiency.

Education

- B.Sc. in Computer Science | Holon Institute of Technology (HIT) | 3rd Year
- Certificate Coursework: Java OOP - Jakarta Servlets, Apache Tomcat.
